- Solid Locking Features for Most Secure Fit
- Ultimate Tactical Solution to Enhance Accuracy under Toughest Environments
- Hard Anodized Finish for Wear Resistance

## UTG M87 TACTICAL MOUNT

MNT-RM870A

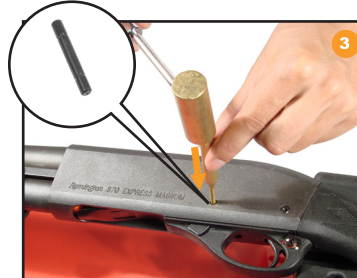

Caution: Make sure firearm is not loaded. Clear the magazine and examine the chamber. Use safe handling procedures at all times.

1. Separate the pre-assembled mount and arrange all parts on a flat surface.

2. Place the rifle right side down in a vise with padded jaws to protect and hold the firearm firmly.

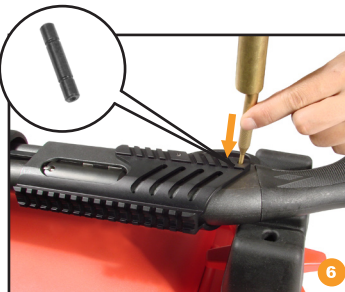

3. Take out the Front Trigger Retaining Pin with a proper brass drift punch and a hammer.

4. Clamp the mount on to the receiver of the shotgun. Make sure the holes on both sides of the mount are well aligned with the holes on the receiver.

5. Replace and tighten firmly the smaller screw supplied with the mount from the left side with provided Allen wrench.

6. Turn over the gun. Tap on the right end of the Rear Trigger Retaining Pin and remove it from the left side of the gun.

7. Set the gun with left side up again. Replace and tighten firmly the larger screw supplied with the mount from the left side.

8. Cock and dry shoot the shotgun to make sure it is in good working order. Now you can install rings and scope on the top rail of the mount.
